

An Introduction to green floor care for:

Schools & Universities

EnviroStar Green® floor care systems feature a floor coating, neutral cleaner, stripper, maintainer and dust mop treatment. EnviroStar GREEN products perform as well as or better than most comparable conventional products and they do so without straining your budget. EnviroStar Green floor care systems are ideal for school settings where taking care of the floors goes hand-in-hand with taking care of the environment.

Amano Pioneer Eclipse currently manufactures 26 green products. All EnviroStar Green products are DfE recognized and five are Green Seal certified. EnviroStar Green products contain none of the following:

- NO Zinc-based cross linking agents.
- NO Ethylene glycol-based coalescing solvents.
- NO Bioaccumulative fluorocarbon surfactants.
- NO VOC's exceeding established regulatory limits.
- NO environmentally toxic preservatives.
- NO alkyl phenol ethoxylate surfactants.
- NO 2-butoxyethanol.
- NO inorganic phosphates.
- NO ethanolamine or ammonia.
- NO flammable solvents.
- NO added fragrances.
- NO non-recyclable packaging.

Amano Pioneer Eclipse manufactures a full line of battery and propane powered stripping machines, scrubbers and burnishers. Some of these can help earn valuable LEED points. See your Amano Pioneer Eclipse representative for details.

Dust Mop Treatment

Effectively removes dust and light dirt accumulations.

All Purpose Cleaner

Easy-to-use all purpose pH 7 cleaner formulated for daily use.

Low Odor Stripper

Removes both GREEN and conventional zinc cross-linked floor coatings and sealers.

Floor Maintainer

Formulated for mop-on and automatic scrubber application to restore a brilliant wet-look shine.

Floor Coating

Excellent wet-look gloss, scuff resistance and long lasting durability in a UHS burnishing program.

Let's Go Green!

GO GREEN with FLOOR CARE PRODUCTS

Children are our greatest asset and the most vulnerable members of our society. Providing a safe and healthy environment for their education is essential to our future.

Exposure to harmful chemical products has been linked to several physiological issues, including learning disabilities, inhibited neurological development, and even cancer.

EnviroStar Green® products can help reduce the effects of harmful chemicals.

Consider this:

Children Have High Metabolisms.

Children breathe more frequently and more deeply than adults, which means toxic chemicals and dust in the air are more likely to get into children's bodies

Children Are Growing.

Because their bodies are still growing and developing, when children get toxic chemicals in their bodies, these chemicals can have different and more long-lasting health problems.

Children Are Exposed to More Toxins.

Children are also more likely to sit on floors, engage in repeated hand-to-mouth activities, and place their heads on surfaces - and so they are more likely to come into contact with toxic chemicals on surfaces.

Other important reasons to go green:

Janitorial staff are more at risk than other building occupants. A study published in the American Journal of Industrial Medicine found that janitorial workers and firefighters experience the highest rates of occupational asthma.

Research tells us that improving IEQ (Indoor Environmental Quality) will improve performance and reduce absenteeism from building related health problems.

The majority of a school maintenance budget involves floor care and sanitation products. A major impact on indoor health of any school can be affected by choosing these products wisely.

GO GREEN with EnviroStar® GREEN

EnviroStar Green products contain safer ingredients than their conventional counterparts. For example, Total Volatile Organic Compounds (VOC's) for EnviroStar Green Floor Coatings average 40% less than conventional coatings.

In addition to reducing and eliminating toxic ingredients EnviroStar Green floor care systems are more durable and reduce the number of stripping and recoating operations.

EnviroStar Green® does more with less!

- EnviroStar Green products help reduce the environmental hazards that negatively affect children's growing, developing bodies.
- Training programs on the proper usage of EnviroStar Green products can help reduce the number of illnesses and injuries that may result from cleaning and maintenance procedures.
- EnviroStar Green products help reduce the risk of asthma, respiratory disorders, allergies, eye irritations, headaches, as well as cancer, reproductive disorders and organ damage.

ENVIROSTAR GREEN

GO GREEN with Third Party Evaluation

Amano Pioneer Eclipse green products have been formulated in partnership with the Environmental Protection Agency's Design for the Environment Program (DfE). This program promotes the integration of cleaner, smarter, and environmentally preferable solutions into everyday business practices.

Many EnviroStar Green primary floor care components are Green Seal® certified. Green Seal is an independent non-profit organization that uses science based standards for a more sustainable world.

These two independent bodies validate the green characteristics of EnviroStar Green products in making schools and the whole planet safer environments for children.

When you see this logo, you know that this product meets Green Seal's environmental standard for industrial and Institutional cleaners based on its reduced human and aquatic Toxicity and reduced smog production potential.

EnviroStar Green Products have been formulated in Partnership with the Environmental Protection Agency's Design for the Environment Program and recognized by the DfE for safer chemistry.
