Pioneer Eclipse EnviroStar Green Gains Additional EPA Recognition

SPARTA, NC --- Pioneer Eclipse Corporation is proud to announce that its new EnviroStar Green CarpetCare system has been recognized by the prestigious EPA Design for the Environment program.

In 2003, Pioneer Eclipse set a milestone in green cleaning when its EnviroStar Green Floorcare System achieved recognition by the EPA DfE, making it the first floorcare system to achieve recognition by any organization as environmentally preferable. Pioneer Eclipse also formulated three cleaners, with the same philosophy of maximum environmental compatibility, in partnership with DfE.

In addition to the EPA DfE recognition, three EnviroStar Green cleaners are certified by Green Seal.

The new Pioneer Eclipse EnviroStar Green CarpetCare System was designed and formulated under the same stringent criteria as the original EnviroStar

Green products to meet or exceed all current international and domestic criteria for chemical safety – without sacrificing performance and without premium pricing.

According to Robert Allen, Vice President of Business Development for Pioneer Eclipse, “This partnership with the EPA’s Design for the Environment Program is an important part of the Pioneer Eclipse commitment to satisfy our customer needs worldwide.

“Not only have we met or exceeded the criteria for this program but also the most stringent international regulatory standards to satisfy our rapidly growing customer base. We are delighted to have earned the DfE recognition, and we intend to parlay these ground breaking formulations into a more diverse product offering,” Allen said.

The new four product EnviroStar Green Carpet Care line is compatible with most carpet types and fragrance free.

EnviroStar Green Extractor & PreSpray Cleaner offers high value and top performance for multiple carpet care jobs. This extraction cleaner offers a one-step solution for direct use in extractors. Used as a pre-spray, it loosens tough soils to boost extraction effectiveness.

EnviroStar Green Extraction Rinse is a concentrated neutralizer that brightens appearance and retards re-soiling after cleaning by neutralizing alkaline residue left behind after cleaning.

EnviroStar Green Soil Release Bonnet Buff loosens tough soils to enhance bonnet cleaning effectiveness. The concentrated cleaner features easy spray-on application.

EnviroStar Green All Purpose Spotter is an easy-to-use, fast acting spray-on, concentrated for economical use to remove tough stains and spots.

Clive Davies, Chief, EPA Design for the Environment, congratulated Pioneer Eclipse on the program's recognition of EnviroStar Green. "EPA's Design for the Environment program seeks to promote the use of institutional cleaners and maintenance products with improved environmental and human health characteristics," Davies said. "EnviroStar Green products . . . fully achieve that objective in the institutional cleaning/maintenance sector."

Pioneer Eclipse Corporation is the one stop source for the equipment, the chemical systems, the training, and the service that provide the ultimate in high quality, cost effective solutions for floorcare and sanitation applications.
