ECOLOGICAL INFORMATION****COMPONENT SUMMARY**Diethylene Glycol Monoethyl Ether

Fathead Minnow; 96 hr; LC50 > 10000 mg/l

Preparation Summary**Ecotoxicity:** This material is highly soluble in water. Limited toxicity tests and models indicate this material should exhibit low toxicity to aquatic organisms.**Environmental fate:** This material will biodegrade relatively rapidly in both soil and water, and will not persist in the environment. Due care should be taken to avoid accidental releases to aquatic or terrestrial systems.

PRODUCT NAME: PRIME-STAR BASE COAT

Bioaccumulation: Because of this material's high solubility and rapid biodegradability, it is unlikely that bioaccumulation will occur in aquatic or terrestrial systems. Models estimate that this material will preferentially partition to water versus air or soil. On the basis of available information this material/preparation is not expected to produce any significant adverse environmental effects, when used as directed.
